groups are divided by a narrow belt of sea known as "Wallace's line," on the opposite sides of which the indigenous animals are as widely divergent as in any two parts of the world. Wallace became convinced of the truth of evolution and originated the theory of natural selection during these travels. His work in the department of the laws of evolution supplements that of his friend, Darwin, and the result is often called the Darwin-Wallace theory.

He visited the United States in 1887. On the occasion of his minetieth birthday he gave out a long statement in which he said:

"I have come to the general continued of sea subject as 1 P. M.
